WILD MARVELS

SUMMER CAMPS
2020

WE INVITE ALL CURIOUS YOUNG MINDS ENTERING GRADES K-8TH
TO PARTICIPATE IN OUR WILD MARVELS SUMMER CAMPS!

Opportunity:

Dirty jobs exist in the zoological field, and it's our job to find people to fill them! Join us this summer at Moody Gardens as a wildlife engineer to get nitty gritty with the natural marvels of our planet, put your design ideas to the test and create environmental blueprints for the future of our oceans and rainforests.

Daily Schedule:

8:30am-4:30pm (Up to 3 attraction experiences per day)
Before Care (camp drop off) - 8:00-8:30am
After Care (camp pick up) - 4:30-5:00pm

Weeks Offered:

Each week has a whole new set of activities and experiences!

June 15th-19th July 13th-17th August 3rd-7th

Camp Groups:

Camps are offered for all three age groups each month.

Seaside Safari (K-2nd) **Nature Rangers** (3rd-5th) **BioQuest** (6th-8th)

Materials (Cost):

EARLY BIRD special- Register by May 1st*

K-5th Grade

Members- \$200

Non-Members- \$225

6th-8th Grade

Members- \$225

Non-Members- \$250

Extended care available (only if prearranged) for \$15 per 30 minute increment a day.

*Registration increases after May 1st. Contact us to find out the cost of your wildlife engineer's adventure after May 1st.

Seaside Safari (K-2nd)

Nurture your curiosity about the natural world as we trek through the Moody Gardens Pyramids. Work with your fellow wildlife engineers to find answers to your questions about the world's oceans and rainforests. Run wild as you create a new habitat, plant or animal straight from your imagination.

Nature Rangers (3rd-5th)

Discover the processes that help ecosystems tick. Monitor the orders that people place for services and resources provided by nature. Put your wildlife engineering skills to the test as you design and build your own sustainable ecosystem protected from natural disasters and human activities.

BioQuest (6th-8th)

Go behind the scenes with Moody Gardens animal care staff. See how we ensure our animals have the latest and greatest advantage we can design. Grab your wildlife engineer toolkit to construct models, complete labs, *slime*, conduct surveys and create plans to help share the conservation mission.
